

Garmin MD200-306 Indicator

[\[Buy Now \]](#)

Garmin Updated: 2008-09-15 RSS

Stay on course with the MD200, a high-quality course deviation indicator (CDI) that displays rectilinear needle movements and contains integral GPS, NAV and VLOC mode annunciators. The panel-mounted MD200 adds a glideslope needle and flag to the features of the GI 102A, which include a VOR/LOC/GPS needle, TO/FROM indicator and NAV warning flag.

MD200 contains an integral resolver for OBS feedback. It also features anti-reflective lenses and is backlit so you can see it at night.

The MD200 is designed for use with the Garmin GNS 480 navigator and SL30 nav/comm installations.

- * Panel-mounted Course Deviation Indicator (CDI)
- * Rectilinear meter movements
- * Integral GPS, NAV, and Back Course (BC) annunciators
